Beamup.ai is looking for a Customer Delivery BIM (Revit and Rhino)Technical Lead

BeamUp is a well-funded and rapidly growing start-up in the field of property technology. We are offering a unique service for the design and lifecycle management of IoT, security and building systems for large enterprises. Our cutting-edge technology is built on top of a rapidly evolving technology stack and is covered by multiple patents.

Our Customer Delivery team is the primary interface with clients and provides key technical know how and support, ensuring our clients needs are met and our product and services continue to evolve based on client feedback

Our unique, highly motivated, interdisciplinary team is looking for a technically capable, (building) Architect with scripting and parametric design experience for a full-time position in our dynamic office in Tel Aviv, working in our Customer Delivery Team. If you are a self starter with passion and drive and a desire to become a software developer, your place is with us!

What will you do?

Your responsibilities will include:

- Maintaining and creating interfaces between software utilities such as Revit and our platform and tools to support our Customer Delivery team.
- Coordinating with our Product and R&D teams to ensure the technical needs of Customer Delivery are being met to deliver at scale and at pace for our clients.
- Providing ongoing technical support and training to Customer Delivery and internal teams.

We want to help you become a full-fledged programmer, so come grow with us!

To be great at your job, you'll need to have

- A positive attitude and an entrepreneurial mindset - you must be comfortable rolling up your sleeves, thrive in ambiguity, and get the work done.
- +3 years experience as an Architect engaged in scripting and parametric design.
- Excellent communication skills and ability to work across multiple projects, align on goals, and deliverables.
- The ability to focus on the details while always looking at the bigger picture. You should be a creative thinker and a great problem solver.

Crucial Skills and Competencies

- Excellent knowledge of AutoCAD, Revit/Dynamo and Rhino/Grasshopper.
- Good, working knowledge of Python.
- Strong desire and aptitude to learn new programming skills
- Willingness to adapt to a dynamic, intense high-tech environment
- Excellent English

Benefits

We are a young start-up with good vibes and passion. Our multi-disciplinary team is highly motivated and focused on how we can learn and grow together which makes us an ideal place to develop your skills and career. We are located in a central Tel Aviv and some of our perks include:

- Pension fund
- Weekly happy hours and frequent team events
- Fully stocked kitchen
- Cibus
